## IPG Photonics Purchases Major Photonics Patent Portfolio

*Fiber Laser Leader Secures more than 100 Key U.S. Photonics Patents from British Telecom*

OXFORD, Mass.--(BUSINESS WIRE)--IPG Photonics Corporation (NASDAQ: IPGP), the world leader in high-power fiber lasers and amplifiers, today reported that it has purchased more than 100 key U.S. patents, and their more than 340 foreign counterparts, by acquiring a photonics patent portfolio from British Telecom. This large portfolio includes patents relevant to both current and future photonics components and systems as well as devices and techniques that are commonly used throughout the photonics industry.

The acquired patents concern pioneering research by British Telecom in the field of photonics dating back to the 1990s. The patents are in the fields of optical fiber lasers and amplifiers, semiconductor devices, integrated optics, fiber gratings, high-speed systems and optical networking.

"With the purchase of these important patents, IPG's intellectual property portfolio is unparalleled in the fiber laser field," said Dr. Valentin P. Gapontsev, IPG Photonics' Chief Executive Officer. "These patents cover pioneering work by British Telecom and we are pleased to have secured the rights to technologies that are so pivotal to our industry. These patents complement our strong IP portfolio, including the growing number of pending patent applications that we already have."

Of particular note to IPG in this portfolio are early patents that cover single mode lasers.

### About IPG Photonics Corporation

IPG Photonics is the world leader in high-power fiber lasers and amplifiers. Founded in 1990, IPG pioneered the development and commercialization of optical fiber-based lasers for use in a wide range of applications such as [materials processing](#), [telecommunications](#), [medical](#), and [scientific and research](#). Fiber lasers have revolutionized the industry by delivering superior performance, reliability and usability at a lower total cost of ownership compared with conventional lasers, allowing end-users to increase productivity and decrease operating costs. IPG has its headquarters in Oxford, Massachusetts, and has additional plants and offices throughout the world. For more information, please visit [www.ipgphotonics.com](http://www.ipgphotonics.com).

### Safe Harbor Statement

Information and statements provided by the Company and its employees, including statements in this press release, that relate to future plans, events or performance are forward-looking statements. These statements involve risks and uncertainties. Any statements in this press release that are not statements of historical fact are forward-looking statements, including, but not limited to, those relating to the Company's intellectual property position and future growth. Factors that could cause actual results to differ materially include risks and uncertainties, including risks associated with the Company's ability to penetrate new applications for fiber lasers and increase market share, the rate of acceptance and penetration of IPG's products, effective management of growth, level of fixed costs from its vertical integration, intellectual property infringement claims and litigation, interruption in supply of key components, contract cancellations, manufacturing risks, competitive factors including declining average selling prices, building and expanding field service and support operations, uncertainties pertaining to customer orders, demand for products and services, development of markets for the Company's products and services and other risks identified in the Company's SEC filings. Readers are encouraged to refer to the risk factors described in the Company's Annual Report on Form 10-K (filed with the SEC on March 29, 2007) and its periodic reports filed with the SEC, as applicable. Actual results, events and performance may differ materially. Readers are cautioned not to rely on the forward-looking statements, which speak only as of the date hereof. The Company undertakes no obligation to update the forward-looking statements that may be made to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.
